SECTION 3
DFE USER
PROCEDURES

DESCRIPTION

● **INITIATING MISSION PLANNING SESSION PROCEDURES**

Begin a mission planning session.

There are three mission planning main menus, one for each category of user identification codes (GSFC user, testing user, and DFE user). Main menu that is called up depends on user ID entered.

DISPLAY

```
Display is Mission Planning Menu                    GMT XXX:XX:XX:XX
ws1        Menu name is 'mp'
- - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - -
              Enter the number or letter of your selection:

                    1   Initiate a Mission Planning Session

                    2   Halt the Mission Planning Session

                    3   Send Health and Status Message

                    0   Back to previous menu

- - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - - -
ADVS:
Enter MISSION PLANNER USER I/D: (1~3 =):
CNTL:
         F1 = REFR    F2 = TOP    F3 = RPRT    F4 = ADVS    F5 = HIST
```

PROCEDURE

● To initiate mission planning session:

--Type 1.

--Observe P/R line: Enter **MISSION PLANNER USER I/D:**
(1~3 =):

--Type (applicable ID).

--Press <RETURN>.

● Or, to initiate mission planning session:

--Type 1.

--Press <RETURN>.

--Observe P/R line: Enter **MISSION PLANNER USER I/D:**
(1~3 =):

--Type (applicable ID).

--Press <RETURN>.

DESCRIPTION

CHAPTER 6 MP PROCEDURES

SECTION 1 GSFC USER PROCEDURES

SECTION 2 TESTING USER PROCEDURES

SECTION 3 DFE USER PROCEDURES

- PROCESS SDT/TDT TAPE PROCEDURES (Cont).

- SHUTTLE DATA TAPE (SDT) PROCESSING PROCEDURES

  SDT processing builds a mission specific database containing data from SDT.

  Database can be named by any valid flight ID.

  Data loaded into database may come from an SDT and TDT from any one flight, i.e. SDT and TDT must have same flight ID, but this flight ID does not have to match database flight ID.

  All references to SDT/TDT database and its resulting products are made via database flight ID.

PROCEDURE

- To select processing of SDT tape :

  --Type 3.

- Observe process SDT/TDT tape screen appears.
